

GaLaDEKO STIXX

TECHNICAL DATA

DECORATIVE MULCH: FIRE, WEATHER AND ROT RESISTANT

- Combines the advantages of wood and stone mulch
- A mineral coating is available in terracotta red (GALA4), brown (GALA7), and charcoal grey (GALA3). The mineral coating is also available in on-request colors such as blue or green per exemple
- Mulch remains stable in shape for years due to mineralization fossilization.
- Proven production method imported from Germany (successfully tested in many countries)

ADVANTAGES OF MINERALIZED MULCH

- Durable and weather-protected (10-year warranty against breakdown)
- No need to renew mulching regularly
- Reduces need for irrigation and weeding
- Low density: ideal for green roofs
- Resistant to fire, fungi and rodents
- Fireproof according to ASTM D2859 and self-extinguishing according to ASTM E648
- Safe for plants
- Available in different colors

INSTALLATION

- Cover bare soil with 7 to 10 cm of mulch. A 50-liter bag covers approximately 7 sq. ft.
- Add every 10 years or as needed

ANALYSIS	
Average length of wood chips	20 mm
Bulk Density	275 kg/m ³
Composition : Fossilized wood chips / recycled ingredients : NA	

Product is delivered on pallets and is available in bags of 50 liters or in bulk (on request)
